Office Action Summary

Art Unit: 1754

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action. The request filed on 6/17/02 for Continued Examination (RCE) based on parent Application No. 09/254316 is acceptable and a RCE has been established.

Claims 1-3, 7, 8 and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by the abstract of JP 09147916.

The abstract teaches Lithium in cellulose (or acrylic)-coated graphite. A single, thin layer is taught which appears consistent with the teaching of 0.01 % polymer in the specification. Thus, no differences are seen.

Applicant's arguments filed 6/17/02 have been fully considered but they are not persuasive.

The claims do not exclude the additional chalcogen of '916, even if it were required by the reference. Moreover, it appears to be an optional component ('is feasible', response pg. 6). The consisting essentially language limits only the 'surface active material', not the structure of the whole assembly claimed. A showing versus the material of the reference is suggested.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (703) 308-2539.
